

Readers for SFERA New entry panels of Bticino systems

Reader module 125 kHz (TF/EM/HID Proximity/Prastel) with integrated door controller designed for installation in **SFERA New** entry panels of **Bticino** audio and video systems.

The reader modules are integrated in the bottom part of the Namespace module and occupy space of a single standard module. The module has to be covered with a top part of a Namespace module with appropriate design matching the panel type.

Remote relay module can be used for increased security.

Reader modules in SFERA New entry panels

- The **APS mini Plus** access control system is a generally applicable system, which is capable of covering all typical access control and time and attendance solutions. The system is suitable for both smaller standard access control systems, and for large and remote systems using an online server.
- The **APS 400** system controllers can control up to 64 reader modules; manage up to 15,000 users and store up to 57,000 records in their events memory when operating in offline mode. A unique feature of the system is the ability to set the behavior of all connected modules by a **user-defined program**.
